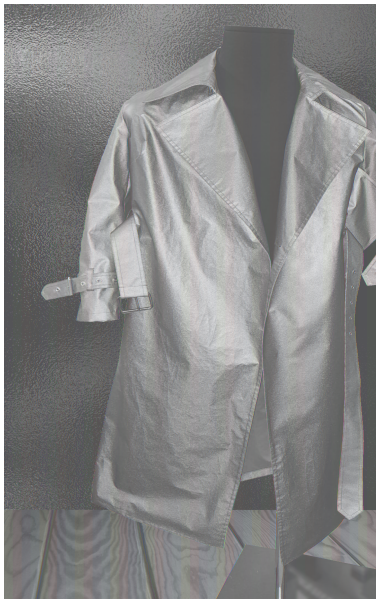
INNOVATION Forum
Milano Unica, 9-11 July 2024

TexClubTec, The Technical and Innovative Textiles division of Sistema Moda Italia, presents in the Innovation Area an overall but at the same time diversified vision of the various uses of innovative, functional and technical textiles for the clothing sector, characterized by the ability to offer specific performance and functionality or be made with innovative and sustainable processes. Within the exhibition Forum of the July 2024 edition, various types of textiles and advanced materials will be presented as well as AI technologies applicable to the fashion sector.

Below, a brief description of the products showcased by:

EXTREME
www.extreme-net.com - Hall 3, booth n. IN03



Trench jacket made in reflective fabric

Reflective fabrics RS06 are suitable for the realization of jacket, thanks to its smoothness got from polyester base. Fitting also for details and insertion in garment.

To stand out for brightness and quality, RS06 reflects gold light, giving a fashion touch.

REFLECTIVE SOLUTION ®, an EXTREME brand.

Trench realizzato in tessuto rifrangente

I tessuti rifrangenti RS06 sono adatti alla realizzazione di giacche, grazie alla loro morbidezza ottenuta dalla base poliestere. Adatto anche per dettagli e inserti del capo.

Per distinguersi con luminosità e qualità, RS06 riflette luce colore oro, donando un tocco fashion.

REFLECTIVE SOLUTION ®, un marchio di EXTREME

Company's profile:

Founded in 1994, Extreme Srl is a consolidated reality in the technical textile sector, which offers its own "REFLECTIVE SOLUTIONS®" range, as fabrics, thermoadhesive labels made from the REFLECTIVE materials.
For years, Extreme has developed other product lines, such as graphic transfers and injection molded and high frequency accessories. All the design phases, both graphic and technical, are developed by internal qualified staff.
As the latest novelty, Extreme offers rubberizing processes performed on ribbons and coulisses, the "GUMMY" effect of the company. Extreme's products or raw materials used meet the strict regulatory standards and are monitored with independent tests.
Extreme's ability in Research & Development, guarantees any type of customized solution, from the choice of materials to the finished product.

Profilo Azienda:

Nata nel 1994, Extreme Srl si pone oggi come una consolidata realtà nel settore più tecnico del tessile, proponendo la propria gamma di prodotti "REFLECTIVE SOLUTIONS®", ossia tessuti, termoadesivi, etichette eseguite in "RIFRANGENTE".
Da anni, Extreme ha sviluppato altre linee di prodotti quali transfer grafici e accessori stampati in iniezione o alta frequenza. Tutte le fasi di progettazione, sia grafica, sia tecnica, sono eseguite da personale interno qualificato. Come innovazione più recente, Extreme propone lavorazioni di gommatura eseguite su nastri o coulisse, l'effetto "GUMMY" dell'azienda.
I prodotti Extreme o le materie prime impiegate, rispondono ai severi standard normativi e vengono monitorati con test indipendenti.
L'esperienza acquisita da Extreme nella Ricerca & Sviluppo, garantisce qualsiasi tipo di soluzione su misura, dalla scelta dei materiali al prodotto finito.
